Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 September 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-3 is/are pending in the application.

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The expressions "the ability" (claim 1), "said combination protective bumper" (claim 2), "said protective bumper", "the structure" (claim 3) have no definite antecedent basis in the claims. Claim(s) 1-3 fail(s) to recite sufficient structural elements and interconnection of the elements to positively position and define : 1) how the loops provide means to restrain; 2) the ability to reduce in size (claim 1) so that an integral structure able to function as claimed is recited.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.

4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-3, so far as definite, are rejected under 35 U.S.C. 103(a) as being unpatentable over Tringali et al. The patent to Tringali et al teaches structure substantially as claimed including a protective bumper (23) and placement (18), "utilizing a tethering system, the ability to reduce in size, a compression type gripping system the only difference being that loops are not present to restrain articles. However, the use of peripheral guards, structure, such as gates to preclude movement of articles placed on a support is well known in the art. Applicant is given judicial notice of such. To use such conventional restraining structure in the same well known purpose would have been obvious and well within the level of ordinary skill in the art, thereby providing structure as claimed, so far as definite. The method would have been obvious in view of the structures.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Guardia, Nurick, O'Reilly, Krause, Kingen, Guyot, Figueroa, Demaio et al, D'Arca, Rutz, Foster teach structure similar to applicant's.
